Skill- 6 ->Spring MVC Web Request Handling Demo

Name: Tadisetti Hari Charan

ID:2400030502

Section:51

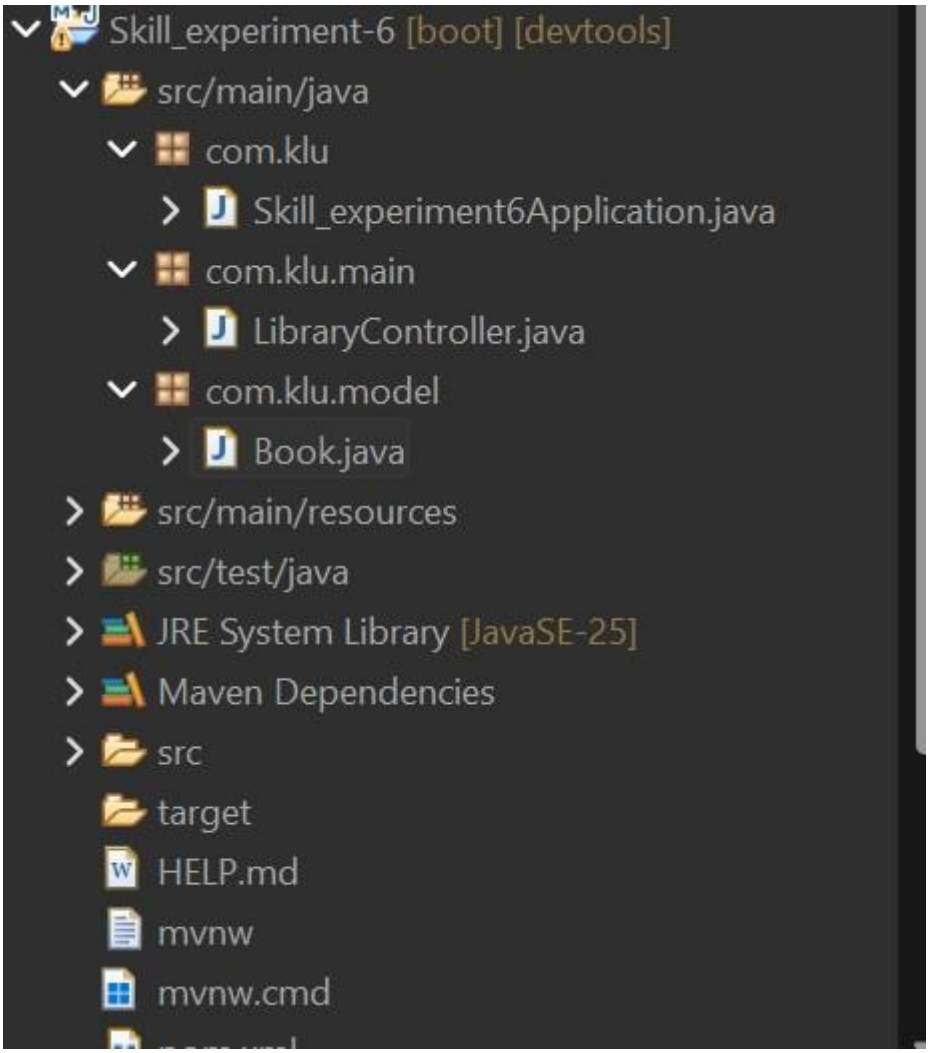
Faculty: Dr.Mohammed Gouse

Course Code: 24SDCS02E

Github Link:

https://github.com/T-Haricharan/FSAD_Skill_Experiments.git

Project Structure:



Code:

Skill_experiment6Application.java | LibraryController.java | Book.java

```java
package com.klu;

import org.springframework.boot.SpringApplication;

@SpringBootApplication
public class Skill_experiment6Application {

    public static void main(String[] args) {
        SpringApplication.run(Skill_experiment6Application.class, args);
    }

}
```

Skill_experiment6Application.java | LibraryController.java | Book.java

```java
package com.klu.main;

import java.util.ArrayList;

@RestController
public class LibraryController {

    private List<Book> books = new ArrayList<>();

    // 2. /welcome
    @GetMapping("/welcome")
    public String welcome() {
        return "Welcome to Online Library System";
    }

    // 3. /count
    @GetMapping("/count")
    public int countBooks() {
        return books.size();
    }

    // 4. /price
    @GetMapping("/price")
    public double bookPrice() {
        return 299.99;
    }

    // 5. /books
    @GetMapping("/books")
    public List<String> getBooks() {
        List<String> titles = new ArrayList<>();
        titles.add("Spring Boot");
        titles.add("Java Programming");
        titles.add("Microservices");
        return titles;
    }
```

2400030502 2400030502 2400030502

Skill_experiment6Application.java | LibraryController.java | Book.java

```java
        titles.add("Microservices");
        return titles;
    }

    // 6. /books/{id}
    @GetMapping("/books/{id}")
    public String getBookById(@PathVariable int id) {
        return "Details of Book with ID: " + id;
    }

    // 7. /search?title=
    @GetMapping("/search")
    public String searchBook(@RequestParam String title) {
        return "Search result for book: " + title;
    }

    // 8. /author/{name}
    @GetMapping("/author/{name}")
    public String author(@PathVariable String name) {
        return "Books written by " + name;
    }

    // 9. /addbook
    @PostMapping("/addbook")
    public String addBook(@RequestBody Book book) {
        books.add(book);
        return "Book added successfully";
    }

    // 10. /viewbooks
    @GetMapping("/viewbooks")
    public List<Book> viewBooks() {
        return books;
    }
}
```

Skill_experiment6Application.java | LibraryController.java | Book.java

```java
package com.klu.model;

public class Book {
    private int id;
    private String title;
    private String author;
    private double price;

    public Book() {}

    public Book(int id, String title, String author, double price) {
        this.id = id;
        this.title = title;
        this.author = author;
        this.price = price;
    }

    public int getId() { return id; }
    public void setId(int id) { this.id = id; }

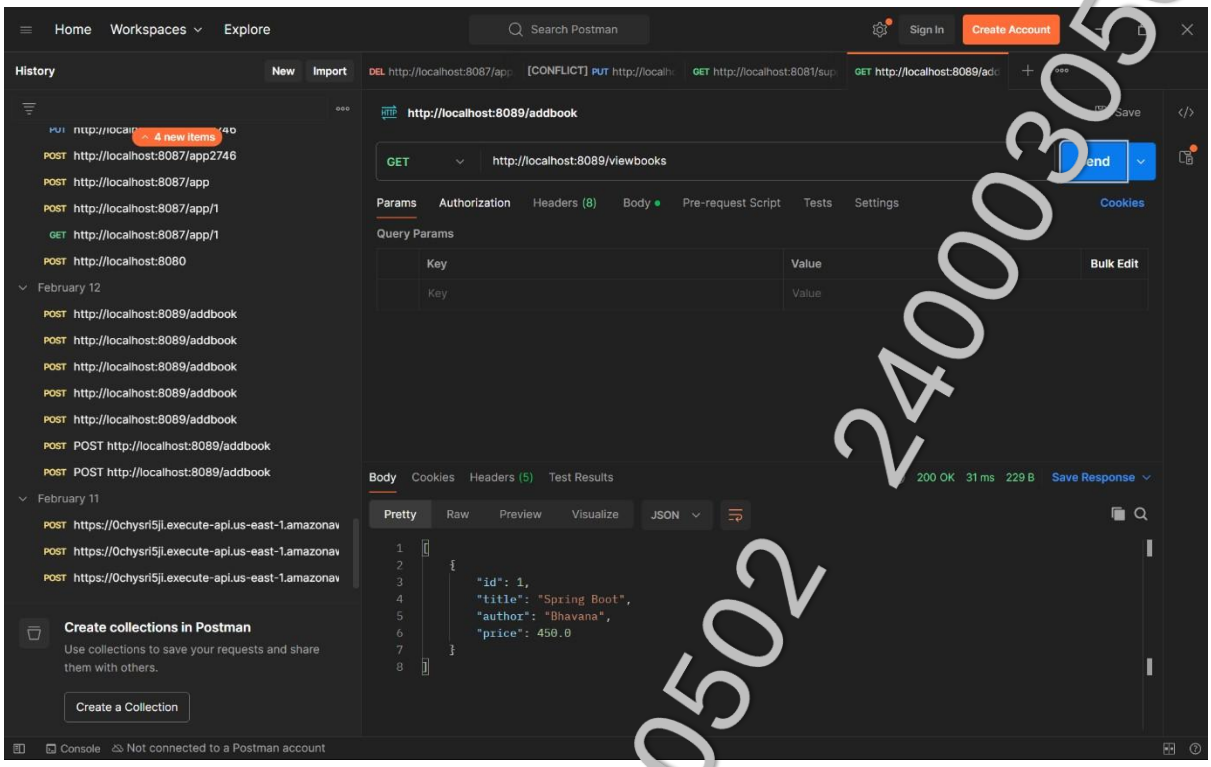
    public String getTitle() { return title; }
    public void setTitle(String title) { this.title = title; }

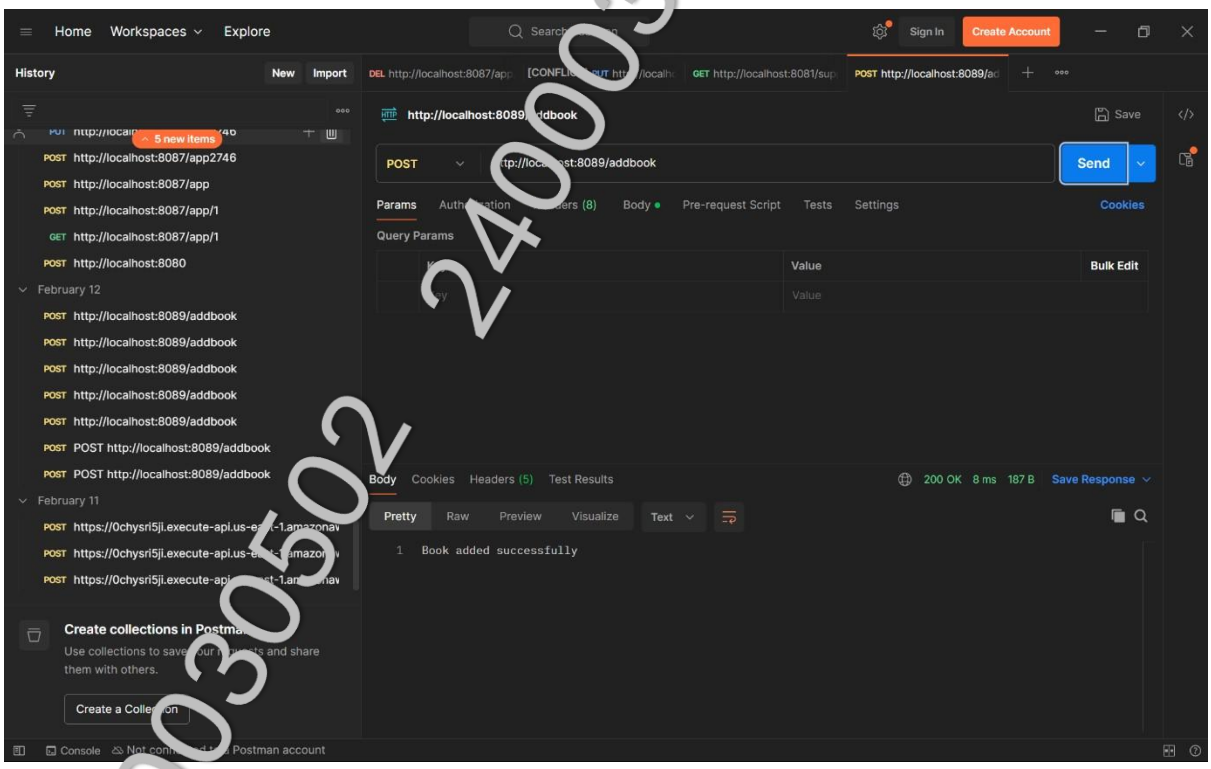
    public String getAuthor() { return author; }
    public void setAuthor(String author) { this.author = author; }

    public double getPrice() { return price; }
    public void setPrice(double price) { this.price = price; }
}
```

2400030502

Output:





2400030502
